

## **Lawrence Livermore National Laboratory purchases PSI – Plot Service for Pro/INTRALINK®**

**Waltham, MA – November 8, 2004** – Etrage LLC, The Engineering Automation Company, today announced that Lawrence Livermore National Laboratory, National Ignition Facility will use PSI – Plot Service for Pro/INTRALINK® for plotting, PDF creation and exporting parts and assemblies to standard formats such as IGES directly from Pro/INTRALINK.

PSI provides designers, engineers and administrators an automatic means of plotting or exporting Pro/INTRALINK objects to communication files such as IGES, PDF®, DXF, HPGL, and images files. PSI has three operating modes for creating plots or files. They are through a Web Access, Batch, or Automatic Monitoring of Pro/INTRALINK for objects promoted to an approved release level.

“Customers liked the functionality of PSI to plot, create PDF files or export Pro/INTRALINK objects using the three operating modes. PSI continues to be enhanced with customer driven requirements at each release.” said Bojan Rapaic, founder and president of Etrage LLC. Ron Zabilski, director of sales and marketing continued, “PSI provides companies with flexibility of accessing and using their Pro/INTRALINK data without having to be Pro/INTRALINK or Pro/ENGINEER experts.”

Visit the Etrage website at: [www.etrage.com/download\\_form.htm](http://www.etrage.com/download_form.htm) to download an evaluation copy of PSI.

### **About Etrage LLC**

Etrage LLC, based in Waltham, MA, is a software development company that focuses on products and services in engineering/design automation and integration, manufacturing automation and data integration. Etrage’s services have been in the areas of automation, customization and integration of 3D solid modeling CAD and PDM systems. Etrage can be found on the web at [www.etrage.com](http://www.etrage.com).
