

ETRAGE LLC Announces that PSI - Plot Service for Pro/INTRALINK now Supports Creation of ProductView Files of Very Large Pro/ENGINEER Assemblies

Orlando, FL – June 6, 2005 – Etrage LLC, The Engineering Automation Company, today announced that PSI – Plot Service for Pro/INTRALINK® version 2.4.1 has been released with support for the creation of ProductView® files from Pro/ENGINEER®. The functionality provides a method of automatically creating ProductView files from Pro/ENGINEER assemblies that are larger than 2 Gigabytes.

PSI provides designers, engineers and administrators an automatic means of plotting or exporting Pro/INTRALINK objects to communication file formats such as native Pro/ENGINEER, IGES, PDF, DXF, HPGL, images files and now ProductView files. PSI has four operating modes for creating plots or files. They are Web Access, Batch, Command Line or Automatic Monitoring of Pro/INTRALINK for objects promoted to an approved release level.

“For visualization of entire projects in ProductView, our customers have asked us to process Pro/ENGINEER assemblies that exceed 2 Gigabyte Windows® operating system limitation,” states Ron Zabilski Etrage director of sales and marketing. “This new ProductView functionality will work with any size Pro/ENGINEER assembly,” said Bojan Rapaic, founder and president of Etrage LLC. “however, it nicely provides an automatic solution for very large assemblies.”

Visit the Etrage website at: www.etrage.com/download_form.htm to request a download of a PSI evaluation file.

About Etrage LLC

Etrage LLC, based in Waltham, MA, is a software development company that focuses on products and services in engineering/design automation and integration, manufacturing automation and data integration.
