

ETRAGE LLC Announces the Release of Pro/ENGINEER Model Clean-up Utilities for Windchill Migration

Waltham, MA – May 2, 2008 – ETRAGE LLC, the Engineering Automation Company, announced the Release of Pro/ENGINEER® Model Clean-up Utilities (MCU) for Windchill® Migration.

When migrating to Windchill® PDMLink® or Windchill® INTRALINK® from Pro/INTRALINK® 3.X there may be issues that need to be resolved. Removing metadata and model configuration as issues can help minimize these problems. The MCU is used to clean up, consolidate and standardize Pro/ENGINEER parameters, layers, and family tables. Standardized Pro/ENGINEER parts, assemblies and drawings help to insure order and consistency with the model configuration and metadata as well as removing erroneous or unnecessary data prior to migrating to Windchill.

The Etrage MCU is used on Pro/ENGINEER models prior to being imported into Windchill PDMLink or Windchill INTRALINK. The tool eliminates issues of multiple parameter names or types and insures consolidation of these parameters to a consistent configuration for all models being imported to Windchill.

The MCU can add items to a layer, create a new layer, rename layers and delete layers. It can also be configured to add parameters to a family table and verify that all instances of a family table can be regenerated.

The MCU can be run on single or multiple models and supports Pro/INTRALINK 3.X workspaces as well as local and network file systems.

Web demonstrations for the Model Clean-up Utilities can be arranged by contacting sales@etrage.com or see Etrage in booth # 117, at the PTC/USER Conference in Long Beach, CA June 1 – 4.

About ETRAGE LLC

ETRAGE LLC is a Waltham, MA - based software development company that focuses on products and services in engineering/design automation and integration, manufacturing automation and data integration. ETRAGE's services have been in the areas of automation, customization and integration of 3D solid modeling Computer Aided Design (CAD) and Product Data Management (PDM) systems. ETRAGE can be found on the web at <http://www.etrage.com/>.
